

NXObject

```
graph BT; NXField --> NXObject; NXGroup --> NXObject; NXFile --> NXGroup;
```

The diagram illustrates a class hierarchy. At the top is the 'NXObject' class. Below it are two subclasses: 'NXField' on the left and 'NXGroup' on the right. Arrows point from 'NXField' and 'NXGroup' up to 'NXObject'. Below 'NXGroup' is another subclass, 'NXFile', with an arrow pointing up to 'NXGroup'.
